Penelitian ini menggunakan jenis penelitian kuantitatif dengan desain penelitian Korelasi fungsional. Penelitian ini bersifat tidak adanya pengaruh, sampel penelitian ini sebanyak 47 peserta didik kelas V. Instrumen penilaian dan angket telah memenuhi estimasi uji validitas dan reliabilitas yang telah ditetapkan. Data dianalisis menggunakan teknik analisis persamaan regresi, koefisien determinasi dan uji signifikansi. Adapun persentase pengaruh ekstrakurikuler pramuka terhadap karakter kepemimpinan sebesar 16%, sedangkan 84% dipengaruhi oleh faktor lain yang tidak dikaji pada penelitian kali ini. Faktor lainnya peserta didik kelas V di SDN Kemang 02 belum sepenuhnya menerapkan karakter yang ada pada indikator karakter kepemimpinan. Dan faktor internal seperti insting atau naluri, adat atau kebiasaan dan kehendak atau kemauan. Serta, faktor eksternal pendidikan dan lingkungan yang ada pada peserta didik masih kurang. Hasil penelitian menunjukkan bahwa tidak adanya pengaruh signifikan ekstrakurikuler pramuka terhadap karakter kepemimpinan peserta didik kelas V di SDN Kemang 02. Hal ini dapat diperoleh melalui perhitungan analisis uji signifikansi yang menghasilkan $t_{hitung} (0,855) < t_{tabel} (2,021)$ maka H_0 diterima dan H_1 ditolak, artinya tidak terdapat pengaruh yang signifikan antara ekstrakurikuler pramuka terhadap karakter kepemimpinan peserta didik.

The background of this study is the lack of school activities on scouts extracurricular and leadership characters in students. Instruments used as the method of collecting data in this study is questionnaire. Research design used in this study is quantitative method with functional correlation research design. The sample of this study is 47 fifth grade students of SDN Kemang 02. The assessment and questionnaire instruments have fulfilled the estimated validity and reliability tests. Data were analyzed using regression equation analysis, coefficient of determination and significance test. The percentage of the effect of the leadership character on the scout extracurricular students is 16%, while the remaining 84% was influenced by other factors that are not examined in this study. Another factor is that the fifth grade students at SDN Kemang 02 have not fully applied the existing character in the leadership character indicators. The results of this study showed that there is no significant effect on the leadership characteristics on the fifth grade students from the scouting extracurricular at SDN Kemang 02. These results were obtained from the calculation of significance test analysis which resulted $t\text{-count} (0.855) < t\text{-table} (2.021)$, which means that H_0 was accepted and H_1 was rejected, meaning that there is no significant effect between scout extracurricular activities on the character of student leadership.
