

ABSTRAK

Tiwi Alawiyah. NIM: H. 1710382 Hubungan Perhatian Orang Tua Dengan Tanggung Jawab Belajar Siswa Pada Masa Pandemi Covid-19. Skripsi Pendidikan Guru Sekolah Dasar, Fakultas Keguruan dan Ilmu Pendidikan, Universitas Djuanda Bogor, 2021

Peran orang tua sangat penting dalam pendidikan dan perkembangan anak, karena orang tua merupakan salah satu faktor yang mempengaruhi tanggung jawab anak dalam belajar. Akan tetapi ada beberapa orang tua yang kurang memperhatikan anaknya ketika belajar di rumah sehingga mengakibatkan menurunnya tanggung jawab belajar siswa. Penelitian ini bertujuan untuk mengetahui ada atau tidak hubungan antara perhatian orang tua dengan tanggung jawab belajar siswa pada masa Pandemi Covid-19 di SDN Tugu Selatan 02. Pendekatan yang dilakukan menggunakan pendekatan kuantitatif dengan jenis penelitian yaitu korelasi sederhana. Populasi dalam penelitian ini yaitu siswa kelas Va dan Vb yang berjumlah sebanyak 81 siswa. Pengambilan sampel dilakukan dengan teknik nonprobability sampling dengan teknik sampel jenuh karena jumlah populasi kurang dari 100. Sampel dalam penelitian ini sebanyak 81 siswa kelas Va dan Vb di SDN Tugu Selatan 02. Teknik pengumpulan data menggunakan angket. Instrumen diuji dengan menggunakan uji validitas menggunakan rumus Product Moment dan uji Reliabilitas menggunakan Alpha Cronbach dengan nilai minimal 0,60. Berdasarkan analisis yang telah dilakukan diperoleh hasil nilai signifikansi yaitu $0,000 > 0,05$ maka hasil penelitian dapat disimpulkan bahwa perhatian orang tua berkorelasi dengan interpretasi nilai 0,634. Maka dapat disimpulkan bahwa perhatian orang tua dengan tanggung jawab siswa memiliki korelasi dengan derajat hubungan yaitu kuat.

ABSTRACT

Tiwi Alawiyah. NIM: H. 1710382 The Relationship between Parents' Attention and Student Learning Responsibilities During the Covid-19 Pandemic. Thesis for Elementary School Teacher Education, Faculty of Teacher Training and Education, Djuanda University Bogor, 2021

The role of parents is very important in the education and development of children, because parents are one of the factors that affect the responsibility of children in learning. However, there are some parents who pay less attention to their children when studying at home, resulting in a decrease in student learning responsibilities. This study aims to determine whether or not there is a relationship between parental attention and student learning responsibilities during the Covid-19 Pandemic at SDN Tugu Selatan 02. The approach used is a quantitative approach with the type of research, namely simple correlation. The population in this study were students of class Va and Vb totaling 81 students. Sampling was carried out using nonprobability sampling technique with saturated sample technique because the population was less than 100. The sample in this study was 81 students of class Va and Vb at SDN Tugu Selatan 02. The data collection technique used a questionnaire. The instrument was tested using the validity test using the Product Moment formula and the reliability test using Cronbach's Alpha with a minimum value of 0.60. Based on the analysis that has been carried out, the results of the significance value are $0.000 > 0.05$, so the results of the study can be concluded that parental attention is correlated with the interpretation of the value of 0.634. So it can be concluded that the attention of parents with the responsibility of students has a correlation with the degree of relationship that is strong.
