Reviewer #1

Reviewer #1's comment

The following are the overall comments under each section to be addressed by the authors.

1. Write one sentence briefly describing the result of your research in the abstract.

We replaced it:

we add one sentence briefly describing the result of research in the abstract: "The results of this study illustrate that the topic of educational supervision can be developed by referring to the terms STEM, quality and performance"

2. Add the impact of the research results in the abstract.

We added the impact of the research result in the abstract: "So that the development of research on technology-based educational supervision is more directed towards the STEM approach."

3. Delete paragraph 1 in the introduction

We remove paragraph 1 in the introduction, and and has added a new paragraph:

"Educational supervision helps in increasing teacher professional competence in teaching and
